

## Steps to Create a Virtual Machine using Virtual Box:

Step: 1 In this video we are going to create a virtual machine using Virtual Box.

Virtual Box needs Microsoft Visual C++ 2019

Step: 2 I am going to select one which has 64-bit

Step: 3 Because I have 64-bit processor

Step: 4 Now we can download Virtual Box.

Step: 5 choose your OS and download it.

Step: 6 Start to install

Step: 7 click next

Step: 8 You can see the features and the location

Step: 9 And then just click next

Step: 10 You can see the click yes

Step: 11 click next

Step: 12 start to install

Step: 13 After the completion of installation click finish to complete the task

Step: 14 Now we can install Virtual Box in our

Let us create a bare virtual machine

Step:1 Give a name

Step:2 u can see the path

Step:3 If you want to virtualize any software u can download iso file and create it.

Step:4 click next

Step:5 My disk storage is 4GB . just click next

Step:6 Now we can allocate the space for virtual machine

Step:7 click next

Step:8 click finish you can see the details above the virtual machine.

Extension

Step:1 select 'file' in the top left of the virtualBox manager.

Step:2 select 'virtual media manager'.

Step:3 u can see ur virtual machine

Step:4 select the virtual machine and click properties

Step:5 u can see the allocated space.

Step:6 If you want to increase move the header to right.

Step:7 And click apply.

Step:8 Now you can extend the space of our virtual machine.
